IMPORTANT ANNOUNCEMENT ABOUT YOUR ELECTRIC COOPERATIVE

Dear Member:

Your cooperative works diligently every day to meet the needs of our members and our communities. This is not a new philosophy. It dates back to your cooperative's Articles of Incorporation that were adopted in the 1930s. These Articles encourage cooperation with other rural electric entities to create efficiencies and keep energy costs as low as possible. Over 75 years later, your not-for-profit cooperative has found an opportunity to do just that.

Recently, Jasper County REMC (Rensselaer) and Kankakee Valley REMC (Wanatah), both not-for-profit rural electric cooperatives, began exploring the possibility of combining our two companies. For years, we have worked together during storms, and shared intellectual and technical experience, equipment and supplies. Now, we are researching ways to expand this successful relationship even further to benefit both memberships.

One of the seven cooperative principles that guides us is "Cooperation Among Cooperatives." We anticipate that by joining two strong cooperatives, we can improve service to our members while maintaining our positive local presence.

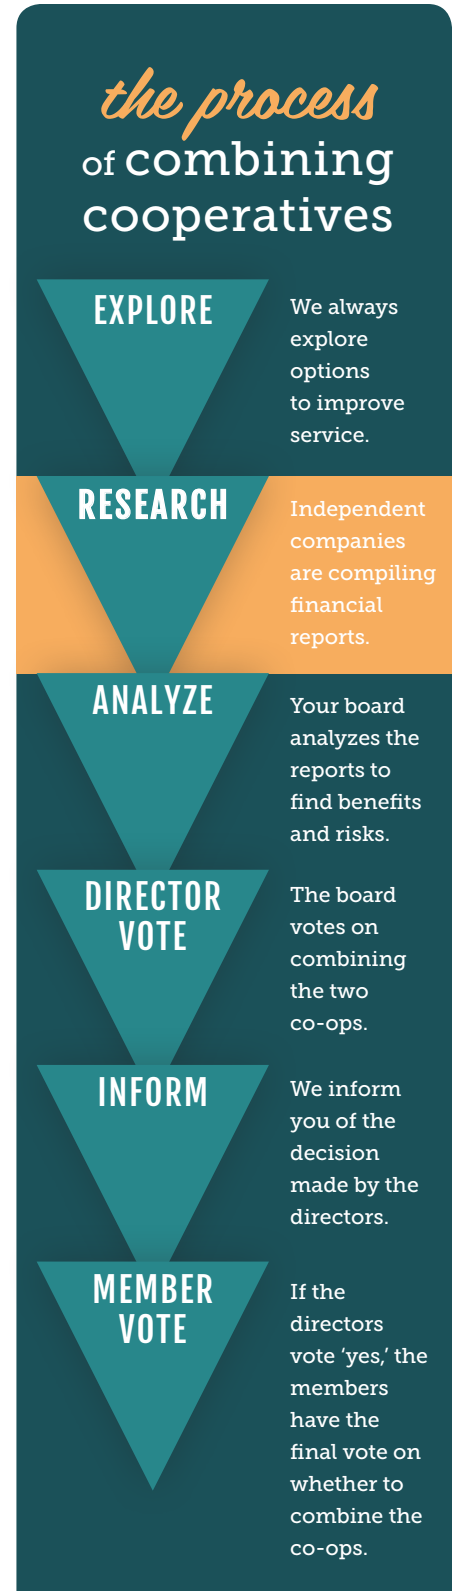

At this time, your locally-elected board of directors and the cooperative management team is conducting a thorough evaluation to determine benefits and concerns relating to the finances and operations of a combined cooperative. Your cooperative wants to meet, and exceed, the growing needs of our members. Exploring this opportunity is a natural next step to achieving that goal.

We will keep you informed each step of the way throughout this process that is shown in our infographic. Please continue to read my article on page 5 of your monthly Electric Consumer magazine and visit our Facebook page for updates.

Sincerely,

BRYAN WASHBURN
CEO/GM
